

Nabil Makarim

Software Developer Intern | Full-Stack Web & Applied AI

Makassar, Indonesia | nabilmkr16@gmail.com | +62 877 6220 1957

github.com/nabilmkr | linkedin.com/in/nabil-makarim16

PROFESSIONAL SUMMARY

Semester 6 Diploma IV student in Informatics and Computer Engineering, building production-grade AI and full-stack applications. Shipped a FastAPI/Streamlit AI skill-gap analysis platform deployed on Hugging Face Spaces; engineered a full-stack gaming news portal (React + Laravel); and developed NLP & computer vision models achieving 91%+ accuracy. Proficient in TensorFlow, React, FastAPI, and Laravel. Completed Dicoding Bootcamp Batch 10 Artificial Intelligence Path. Available for full-time internship from late June 2026, open to relocation.

EDUCATION

Politeknik Negeri Ujung Pandang

Diploma IV – Informatics and Computer Engineering

Aug. 2023 – Expected Aug. 2027

Makassar, Indonesia

- GPA: 3.40/4.00; currently Semester 6. Available for internship from late Jun. 2026 or Aug.–Dec. 2026.
- Relevant coursework: System Analysis & Design, Network Systems, Human-Computer Interaction, Web Development, Database Systems.

SELECTED PROJECTS

Gap Sense

AI Skill Gap & Career Trend Platform

Dicoding Capstone Project

Tech: Python, FastAPI, Streamlit, TensorFlow, SentenceTransformers, Groq

- Led a 4-person Dicoding capstone team and conceived the core product idea for an AI-powered skill-gap analysis platform.
- Engineered backend services, preprocessing workflows, semantic gap analysis, and a Groq-based AI career consultation module, delivering end-to-end Streamlit integration.
- Deployed the FastAPI/AI backend to Hugging Face Spaces and the Streamlit dashboard to gapsense.streamlit.app, making the product publicly accessible.

Luxe News

Full-Stack Gaming News Portal

Portfolio Project

Tech: React 18, Vite, Tailwind CSS, Laravel 12, Filament, MySQL

- Engineered the Laravel backend, Filament CMS, and 50+ REST API endpoints covering news, games, tournaments, categories, banners, and comments.
- Integrated backend content into the React frontend; implemented Laravel Sanctum authentication to secure all API endpoints and MySQL-backed data management.
- Streamlined admin content workflows with slug-based routing support, reducing manual publishing overhead. Repo: github.com/nabilmkr/Luxe-News.

SeaBank Sentiment Analysis

NLP Classification Project

Dicoding Final Submission

Tech: Python, TensorFlow, SBERT, SVM, Random Forest, TF-IDF, Sastrawi

- Built a sentiment analysis system for 15,000 SeaBank Google Play reviews labeled as positive, neutral, and negative from app ratings.
- Benchmarked three approaches: SBERT + Dense Neural Network (91.46% test accuracy), SVM + TF-IDF (91.85%), and Random Forest + Bag of Words; selected the best-performing model for deployment.

Insect Pest Classifier

Computer Vision Project

Dicoding Final Submission

Tech: TensorFlow, Keras, DenseNet121, Transfer Learning, TensorFlow Lite, TensorFlow.js

- Trained a DenseNet121 transfer-learning model on 13,272 images across 5 insect pest classes, achieving $\approx 88.76\%$ validation accuracy by fine-tuning the last 50 layers.
- Exported the trained model into SavedModel, TensorFlow Lite, and TensorFlow.js formats to support multi-platform deployment.

Digital Twin Solar Panel Monitoring

Academic Project

Web-Based 3D Monitoring System

Tech: Unity, IoT Broker, AI Integration, Data Visualization

- Integrated Unity, IoT broker, and AI components to display real-time monitoring data in a web-based 3D solar panel model.
- Supported data integration for an academic digital twin system focused on solar panel monitoring and visualization.

CERTIFICATIONS

Dicoding Bootcamp Batch 10 – Artificial Intelligence Path

Completed Apr. 2026

Completed intensive bootcamp covering machine learning, deep learning, and AI project development.

HIMATIK-PNUP Full-Stack Web Development Bootcamp

Mar. 2025 – Jul. 2025

Completed full-stack web development training with frontend, backend, and application development practice.

LEADERSHIP & ORGANIZATION

HIMATIK-PNUP

Sep. 2025 – Present

Vice Chairperson for Internal Affairs

Makassar, Indonesia

- Coordinate and supervise 4 internal departments (Education, Cadre, Secretariat, and Talent) to streamline internal operations and ensure strategic alignment across all programs.
- Orchestrated a cross-institutional collaboration with DCC Universitas Dipa to execute **D-VERSE 2026 (GreenTech Era)**; successfully managed a joint committee, secured 6 corporate sponsorships (including Dicoding & idCloudHost), 9 community partners (including GDG chapters), and 5 media partners, attracting 300+ seminar attendees and 20+ competitive programming teams.
- Oversaw the execution of **Mini Bootcamp HIMATIK**, achieving a 100% session completion rate and ensuring all participant teams successfully developed and presented their final Web Development projects.
- Directed strategic planning for **Inaugurasi '25**, a large-scale cultural and networking event that secured 2 corporate sponsorships, attracted 800+ attendees, and received formal recognition from the university director and department heads.

Student Representative Council (MPK) MAN 2 Kota Makassar

Jun. 2020 – Jun. 2021

Member, Commission IV – Discipline & Leadership

Makassar, Indonesia

- Developed a structured case-recording system to document and track disciplinary issues.

WORK EXPERIENCE

CV Aydin Perkasa

Jan. 2024 – Mar. 2024

Administrative Assistant

Makassar, Indonesia

- Managed marketplace product listings to improve product availability and data accuracy.
- Maintained sales and inventory data in Microsoft Excel for daily reporting and stock tracking.

Waroeng Lago

Oct. 2022 – Dec. 2022

Barista

Makassar, Indonesia

- Maintained service quality and speed during peak operational hours.
- Coordinated with team members to keep service flow consistent during busy shifts.

SKILLS

Programming	Python, JavaScript, PHP, HTML, CSS
Frontend	React.js, Vite, Tailwind CSS, React Router, Axios
Backend	Laravel, FastAPI, REST API, Laravel Sanctum, MySQL, Filament
Deep Learning	CNN, Transfer Learning (DenseNet121), Fine-tuning, Model Export (SavedModel, TF Lite, TF.js)
NLP	Semantic Similarity (SBERT), Sentiment Classification, Text Preprocessing (Sastrawi), TF-IDF, Word Embeddings
Tools & Deployment	Git, GitHub, Postman, Figma, Hugging Face Spaces, Streamlit, Notion
Soft Skills	Strategic leadership, analytical thinking, team coordination, communication, problem solving
