

Nabil Makarim

Software Developer Intern | Full-Stack Web & Applied AI
Makassar, Indonesia | nabilmkr16@gmail.com | +62 877 6220 1957
github.com/nabilmkr | linkedin.com/in/nabil-makarim16

PROFESSIONAL SUMMARY

Semester 7 Informatics and Computer Engineering student who pairs hands-on AI/full-stack development with real leadership experience — coordinating 4 departments and 300+ event attendees as HIMATIK-PNUP's Internal Affairs lead. Shipped an AI skill-gap platform with automated CI/CD deployment, a full-stack gaming news portal serving 50+ REST endpoints, and an AI-powered finance assistant combining machine learning with generative AI. Trained through Microsoft Elevate (Data Science & AI), AWS Academy Cloud Foundations, and Dicoding's AI bootcamp. Available for full-time internship from August 2026, open to relocation.

EDUCATION

Politeknik Negeri Ujung Pandang

Aug. 2023 – Expected Aug. 2027

Diploma IV – Informatics and Computer Engineering

Makassar, Indonesia

- GPA: 3.40/4.00; currently Semester 7. Available for internship from Aug. 2026.
- Relevant coursework: System Analysis & Design, Network Systems, Human-Computer Interaction, Web Development, Database Systems.

SELECTED PROJECTS

Gap Sense

Dicoding Capstone Project

AI Skill Gap & Career Trend Platform

Tech: Python, FastAPI, Streamlit, TensorFlow, SentenceTransformers, Groq

- Led a 4-person Dicoding capstone team and conceived the core product idea for an AI-powered skill-gap analysis platform.
- Engineered backend services, preprocessing workflows, and Sentence-BERT-based semantic similarity analysis to match user skills against job postings, plus a Groq-based AI career consultation module.
- Deployed via GitHub Actions CI/CD to auto-sync the FastAPI/AI backend to Hugging Face Spaces, and Streamlit Cloud to auto-deploy the frontend on every push, keeping gapsense.streamlit.app continuously up to date. Repo: github.com/Alvin-Ardiyansyah/Capstone-Project-Dicoding.

Luxe News

Academic Project

Full-Stack Gaming News Portal

Tech: React 18, Vite, Tailwind CSS, Laravel 12, Filament, MySQL

- Engineered the Laravel backend, Filament CMS, and 50+ REST API endpoints covering news, games, tournaments, categories, banners, and comments.
- Integrated backend content into the React frontend with lazy loading and on-demand Axios calls to improve initial load performance; implemented Laravel Sanctum authentication to secure all API endpoints.
- Streamlined admin content workflows with slug-based routing support, reducing manual publishing overhead. Repo: github.com/nabilmkr/Luxe-News.

Cuanify

Academic Project

AI-Powered Personal Finance Assistant

Tech: React Native, Laravel 11, FastAPI, Random Forest (Scikit-learn), Google Gemini 2.5 Flash, MySQL

- Built an AI-powered finance tracker combining Random Forest financial-health classification (Kritis/Sehat/Waspada) with Gemini 2.5 Flash-generated advisory narratives; designed a self-generated synthetic dataset pipeline to solve cold-start (no real user data), achieving 100% accuracy on the synthetic test set.
- Developed the React Native mobile app and Laravel 11 REST API backend; secured authentication with Google OAuth and Laravel Sanctum across all endpoints.
- Integrated mobile, backend, and AI services into a single monorepo as part of a 3-person team over 3–4 months. Repo: github.com/nabilmkr/Cuanify.

Smart Fan CV Control

Academic Project

Touchless Fan Control with Face Verification & Gesture Recognition

Tech: Raspberry Pi 4, DeepFace (ArcFace), MediaPipe, FastAPI, OpenCV, GPIO/PWM

- Built a touchless smart fan controller using DeepFace (ArcFace) face verification to gate access and MediaPipe hand-gesture recognition (1–5 fingers) to set fan speed.
- Designed a Finite State Machine to orchestrate authentication, gesture recognition, and GPIO/PWM hardware control on Raspberry Pi 4 with no cloud dependency.
- Delivered a working prototype demonstrating real-time computer-vision inference on edge hardware as part of a 3-person academic team over 3–4 months. Repo: github.com/nabilmkr/smart-fan-cv-control.

CERTIFICATIONS

Microsoft Elevate

Jun. 2025 – Jun. 2026

Completed a Microsoft apprenticeship covering Data Science and AI across 5 tracks: Python Programming, Machine Learning, Data Processing Fundamentals, Data Science with Microsoft Fabric, and Generative AI Applications using Microsoft Azure.

Dicoding Bootcamp Batch 10 – Artificial Intelligence Path

Completed intensive bootcamp covering machine learning, deep learning, and AI project development.

AWS Academy Graduate – Cloud Foundations

Trained in AWS Architecture, AWS Cloud, Core Services, Pricing, and Support.

Oct. 2025 – Apr. 2026

Issued Jul. 2026

LEADERSHIP & ORGANIZATION

HIMATIK-PNUP

Vice Chairperson for Internal Affairs

- Coordinate and supervise 4 internal departments (Education, Cadre, Secretariat, and Talent) to streamline internal operations and ensure strategic alignment across all programs.
- Orchestrated a cross-institutional collaboration with DCC Universitas Dipa to execute D-VERSE 2026 (GreenTech Era); successfully managed a joint committee, secured 6 corporate sponsorships (including Dicoding & idCloudHost), 9 community partners (including GDG chapters), and 5 media partners, attracting 300+ seminar attendees and 20+ competitive programming teams.
- Oversaw the execution of Mini Bootcamp HIMATIK, achieving a 100% session completion rate and ensuring all participant teams successfully developed and presented their final Web Development projects.
- Directed strategic planning for Inaugurasi '25, a large-scale cultural and networking event that secured 2 corporate sponsorships, attracted 800+ attendees, and received formal recognition from the university director and department heads.

Sep. 2025 – Present

Makassar, Indonesia

Student Representative Council (MPK) MAN 2 Kota Makassar

Member, Commission IV – Discipline & Leadership

- Developed a structured case-recording system to document and track disciplinary issues.

Jun. 2020 – Jun. 2021

Makassar, Indonesia

WORK EXPERIENCE

CV Aydin Perkasa

Administrative Assistant

- Managed marketplace product listings to improve product availability and data accuracy.
- Maintained sales and inventory data in Microsoft Excel for daily reporting and stock tracking.

Jan. 2024 – Mar. 2024

Makassar, Indonesia

Waroeng Lago

Barista

- Maintained service quality and speed during peak operational hours.
- Coordinated with team members to keep service flow consistent during busy shifts.

Oct. 2022 – Dec. 2022

Makassar, Indonesia

SKILLS

Languages	Python, JavaScript, PHP, HTML, CSS
Frontend	React.js, Vite, Tailwind CSS, React Router, Axios
Backend	Laravel, FastAPI, REST API, Laravel Sanctum, MySQL, Filament
AI/ML	Random Forest, Scikit-learn, Synthetic Dataset Design, Sentence-BERT (Semantic Similarity), OpenCV, MediaPipe, DeepFace (ArcFace)
Cloud & DevOps	AWS, Microsoft Azure, GitHub Actions (CI/CD), Hugging Face Spaces, Streamlit Cloud
Tools	Git, GitHub, Postman, Figma, Notion
Soft Skills	Strategic leadership, analytical thinking, team coordination, communication, problem solving
